The Cotton Movement. The receipts of cotton at all the ports uring the week ending Friday evening, Sept. 30, were 55,672 bales, against 56,386 for the corresponding week last year. The exports for the week were 10,163 bales, while the stocks at all the ports were 106,-419 bales. There is an increase in the exports of 1,425 bales while the stocks are 10,898 bales more than they were at the corresponding date last year. The New York Financial Chronicle of the 1st inst.

Our market the past week has been greatly depressed, and prices have declined daily. This is the result of the same causes referred to in our last—a pressure to sell on Southern account, a temporary stoppage of some of our mills from lack of water, but, the war in Europe is checking the consumption there. During last week until Friday, it was hoped that the peace negotiations would be successful, consequently there was more confidence. This week we have the entire abandonment of all efforts for closing the war at present, and many rumors that Russia, and perhaps other powers, will soon be involved in the same struggle. Whether there is good ground for this latter belief we very much doubt, but still it has served to weaken the foreign markets, and the result is a decline of middling uplands in Liver-pool from 9 d. last Friday to 9d. to-day, and in our own market from 18c to 16%c. As stated above, this downward movemen has been assisted by the depression in the Southern markets, and the pressure to sell on Southern account here, while the consumption of spinners has necessarily been lins, at \$1.25 a yard, at E. & J. North-

By telegram from Galveston to-night we are informed that the weather there has continued warm and dry all the week, that | Java 32@33c. the picking is progressing finely, and that the thermometer during the week has averaged 84. INDIA COTTON. - Our mail advices from

India are this week brought down to August 16, are, as to extent of ground planted, simply confirmatory of those we have published during past weeks. The result on this point of all the information thus far received is that full as much cotton has been and is being planted as was planted last year. To this effect we now have what would seem to be quite definite news from the Berars (Comrawottee and Akote, the Central Provinces (Hingunhat,) Guzerat (Surat and Broach,) Dhollers and Dharwar, furnishing more than nine-tenths of the Bombay shipments, and also from Sindh and Punjab, which seek the market through Kurrachee. As to the weather and prospects, the latest advices appear to be on the whole favorable, though i sections there had been too much rain, making replanting necessary. One other fact is important at the present time in ostimating the probable shipments of the year, and that is the extent of old crop on hand, which is generally put down at a figure above the average. We notice that Messra Finlay, Clark & Co. estimate the stocks in Dhollera, Cutch, etc., at about three-eights of the crop. Low prices, however, may prevent these reserved stocks from being drawn down during the year, as India shipments are always largely effected

by the market rates. STOCKS OF COTTON AT INTERIOR TOWNS:-Below we give the figures received to-night, showing the stock of cotton at the interior ports at the close of business to-day, and add those for last week and the correspond-
